

Grilles at a Glance

SG3000 Series

Vertical coiling security grille.

- Stainless steel or aluminum vertical links and horizontal rods
- Motor, hand crank, hand chain or push-up operation
- Applications include parking facilities, schools, shopping malls and store fronts

Safescape® G1000 Series

Vertical coiling, self-opening security grille with a swing door egress option.

- Model G1500 – a swing door can be used instead of raising the assembly
- To accommodate higher occupant loads, dual complying swing egress doors are available
- Applications include schools, hospitals, casinos, office buildings and airports

SC3000G

Side coiling security grille.

- Close off areas where head room and side room restrictions exist
- Capable of navigating around a radius as small as 12 inches
- Applications include retail, schools, hospitals, subways and parking facilities – primarily helpful with security and crowd control

Safescape® G4000 Series

Side coiling, self-opening security grille with a swing door egress option.

- When both security and egress are issues
- Model G4500 incorporates integral swing egress door(s) for higher occupancy loads
- Applications include schools, hospitals, office buildings and airport applications
